

Airworks® innovation combines air and technology to manufacture compact, durable, user-friendly machines and specially formulated film to create strong and lightweight package protection.

Cirrus machines come in a variety of sizes for any size operation, and have several options available for specific applications. Cirrus films, using AirStop technology also come in several sizes and thicknesses, are environmentally friendly, and fiscally responsible.

The combination of films and machines provide users with the ability to protect their products, reduce costs and maintain efficient operations.

Features	Benefits
AirStop Technology	<ul style="list-style-type: none"> ◆ Film layers are sealed from the inside, maintaining the integrity, strength and durability of the overall structure
Sustainability	<ul style="list-style-type: none"> ◆ Curbside recyclability ◆ 95% source reduction, minimal carbon footprint ◆ Reduced storage requirements
Protection	<ul style="list-style-type: none"> ◆ Burst strengths up to 1,100 pounds under static load ◆ Pillows conform to product shapes
Film Variety	<ul style="list-style-type: none"> ◆ 4x4, 4x8, 5x8, 8x8, 4x12, 4x16, 16x16 pillow sizes ◆ SoftLayer (bubble) and SoftWrap (tubes) designs
Machine Variety (all units 18"x19"x10", 25#)	<ul style="list-style-type: none"> ◆ Cirrus 80 – 80 ppm, large rolls, SoftLayer, SoftWrap ◆ Cirrus 80S – 80 ppm, small rolls ◆ Cirrus 150 – 150 ppm, all film sizes and designs ◆ Cirrus 160 – 160 ppm, large rolls
Accessories	<ul style="list-style-type: none"> ◆ Optical control sensors for output control ◆ Remote foot and hand controls for easier operation ◆ "Always There" Smart Bins
